Subject: Updated RA Recommendation Based on the May 10 Reclamation Allocation and Default Flow Schedule

Apurba,

I am writing to confirm my decision to concur with the Default Flow Schedule contained in Table 6 of your May 10 Allocation. Accordingly, I will not be providing an alternative Interim Flow Schedule at this time.

Your suggested Default Flow Schedule in Table 6 is provided below for the benefit of those copied by this response. Based on my concurrence, I expect:

- The current 1100 cfs Interim Flow releases to continue through May 25;
- Interim Flow releases would decrease to 900 cfs on May 26;
- Releases would decrease to 700 cfs on May 27;
- Releases would decrease to 365 cfs on May 28; and
- Finally, releases from Friant Dam would decrease to 350 cfs on May 29.

Starting May 30, Interim Flow releases for the remainder of the Water Year would match the flow schedule set forth in Table 6.

Table 6 - Default Flow Schedule

Start Date – End Date	Flow Release
March 1 – April 16	350 cfs
April 17 – April 23	500 cfs
April 24 – May 2	700 cfs
May 3 – May 7	1000 cfs
May 8 – May 25	1,100 cfs
May 26 – May 26	900 cfs
May 27- May 27	700 cfs
May 28 – May 28	365 cfs
May 29 – Oct 31	350 cfs
Nov 1 – Nov 10	700 cfs
Nov 11 – Feb 28	350 cfs

Please let me know if you have questions. Thanks.

Rod
